## Product specifications

Product code:	<b>MJ63</b>
Overall length:	3.6m
Horizontal width:	50mm
Vertical height:	50mm
Finish:	Mill finish – not anodised
Lengths per carton:	10

## Installation instructions

Cut the aluminium finishing cove to your required length, secure the aluminium finishing cove in place by applying MJS GF400 construction adhesive to the underside of the aluminium finishing cove to the manufacturers recommendations.

Seal along the top and bottom edges of the aluminium finishing cove using Ardex ST neutral cure silicone, ensuring to seal and form a continuous uninterrupted surface along the product edges creating an integral surface finish to adjoining materials, removing any ledges and locations for the accumulation of dirt or grease to the requirements of AS4674-2004.

## Creating corner cuts

To create mitred corner cuts we recommend the use of a mitre cutting box to ensure an accurate clean cut to your required angles. Install and Seal all corner joins using Ardex ST neutral cure silicone as per the above requirements.

**Safety statement:** When cutting or drilling aluminium we recommend the use of safety glasses and gloves.
