

Tradies Choice – Master Additive

Tradies Choice Master Additive

DESCRIPTION

Tradies Choice Master additive is a concentrated white acrylic liquid to be used with cement based tile adhesive. Ideal for immersed tiling applications such as swimming pools and spas etc.

Can be used with grouts to increase flexibility and strength.

Master additive can be mixed with sand and cement screeds to increase strength.

SURFACE PREPERATION

The surface must be clean, dry firm and free of dust oil, grease, wax and curing compounds.

The substrate must be installed according to the relevant standards and manufacturer recommendations.

All porous surfaces must be primed with SAS Master Primer. For non-porous surfaces such as existing tiles, adhesives must be primed using SAS Master Primer neat. Please contact SAS Technical Team for further information.

MIXING

Tiling in immersed situations

Mix 1 part additive to 2 parts water

Grout additive

Mix 1 part additive to 3 parts water

Sand cement screeds

Mix 50 – 50 additive to water

MOVEMENT JOINTS

Movement joints must be in accordance with Australian Standards AS 3958.

PACKAGING

Master additive is available in 5L, 20L containers

Precautions

- When tiling externally that is above 2.7m high please contact the SAS Technical team for further information.

Technical Data

- Appearance** – White liquid
