

250g Aerosol

300g Aerosol

Terminator

HIGH PERFORMANCE ODOURLESS MULTI INSECT KILLER

CAN CONTROL BOTH FLYING INSECTS AND CRAWLING INSECTS WITH ONE SHORT SPRAY IN THE DIRECTION OF THE FLYING INSECT AND DIRECTLY ON THE CRAWLING INSECT FOR FAST KNOCKDOWN AND QUICK KILL, PLUS CAN ALSO BE USED AS COMPLETE ROOM TREATMENT.

KILLS:

Ants

Cockroaches

Flies

Mosquitoes

Moths

Silverfish

Spiders

Wasps

PLEASE RECYCLE

FAST KNOCKDOWN

LABEL INSTRUCTIONS

HOW TO USE: Shake can well before using.

TO KILL Flying Insects: One short spray in the direction of the flying insects is adequate for fast knockdown and quick kill.

For complete treatment of average sized room:

Close all doors and windows then spray high in the air for 4-5 seconds. The product begins to act immediately on contact with insects.

TO KILL Crawling Insects: Spray directly on the insect.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED.

PRECAUTIONS: CAUTION. KEEP OUT OF REACH OF CHILDREN. EXTREMELY FLAMMABLE. DO NOT SPRAY ON A NAKED FLAME OR INCANDESCENT MATERIAL. KEEP AWAY FROM SOURCES OF IGNITION-NO SMOKING.

Do not spray towards the face. Do not spray directly onto humans, pets, exposed foods, food utensils or food preparation areas. Cover fish tanks, remove birds before spraying. Do not spray on delicate fabrics, furnishings, paint work or plastic surfaces without prior testing.

BEWARE: DELIBERATELY SNIFFING OR INHALING CONCENTRATED SPRAY CAN BE HARMFUL OR FATAL.

SAFETY DIRECTIONS: This product may irritate the eyes and skin. Avoid contact with the eyes and skin. Wash hands after use.

FIRST AID: If poisoning occurs, contact a Poisons Information Centre Phone Australia 13 11 26, New Zealand 0800 764 766.

STORAGE & DISPOSAL: DO NOT store near flame, in

vehicles or near any source of heat. Aerosols should be completely empty before disposing. Recycle empty cans if a facility is available or place used can in household rubbish. PRESSURISED DISPENSER, PROTECT FROM SUNLIGHT AND DO NOT EXPOSE TO TEMPERATURES EXCEEDING 50°C. KEEP IN A COOL DRY PLACE OUT OF THE SUN, AND OUT OF REACH OF CHILDREN. DO NOT PIERCE OR BURN THIS CAN EVEN AFTER USE.

PROPELLANT: HYDROCARBON: The propellant is the chemical that forces the contents from the aerosol container when the valve is opened. CFC Free.

Approved by the Australian Government Authority, Australian Pet & Veterinary Medicine Association (APVMA). Recyclable. Refer to www.terminatorpest.com.au for MSDS Information.

BE SAFE WITH AEROSOLS

GENERAL SAFETY PRECAUTIONS: Aerosols have been used and stored safely in homes for over 60 years. There are very few aerosol accidents and those that do occur are usually caused by not following the instructions on the product label or deliberately misusing or abusing products. Aerosols are safe because of the care the industry takes in the design, production and testing of aerosols. They are tested at elevated temperatures and under extreme pressures so they can cope with unexpected conditions.

Many aerosols contain gases and liquids that may be flammable near a fire or heat. They also contain contents under pressure. This pressure increases with heat and may cause the can to burst.

To enjoy the many benefits of aerosols, always carefully read and follow the label instructions.

In case of an emergency, always dial 000.

AEROSOLS ARE PRESSURISED SO PLEASE REMEMBER:

- Do not put aerosols on a bonfire, even when they

are empty, because they will explode and may cause injury.

- Do not pierce aerosols, even when they are empty, because there is always some pressure, and possibly some of the product left. It may be flammable or cause injury if you pierce the can.

- Keep aerosols out of the sun and in a cold dry place away from heat. The pressure inside the can increases greatly in the heat and may cause it to burst.

- You should never keep aerosols inside cars because even in winter, temperatures can rise quickly.

AEROSOLS CONTAIN A CONCENTRATED PRODUCT SO:

- You only need to use them in short bursts unless the instructions say otherwise.

- If you are using them in a confined space, like a cupboard or under the sink, two or three second bursts should be enough. Make sure that you open windows or doors afterwards.

- Do not spray aerosols near your eyes as the contents may irritate them.

AEROSOL ABUSE:

Volatile Substance Abuse, often called "sniffing" or solvent abuse, is extremely dangerous and can kill instantly. Some young people do this to get intoxicated on the fumes of these products. The wide range of products which are abused are readily available in the homes and shops. They include:

- Butane lighter fuels
- Aerosols
- Adhesives.
