Cyclone

Solvent for Cleaning and Stripping

CYCLONE is a specialty solvent system specifically designed for dilution and/or removal of **ENDURE** surface sealer.

Always wear Personal Protective Equipment (PPE) – A minimum requirement of Safety Glasses, Mask, Gloves & Boots. Damage to clothing may occur.

Sealer stripping:

1. Flood 1-2 metres of surface to be stripped with **CYCLONE** and allow solvents to react with **ENDURE** for up to 3-5 minutes.
2. Saturate a rag in **CYCLONE** and wipe the sealer from the surface using a mopping action. Continue mopping process until sealer is removed from the floor.
3. Try not to “wipe” or “mop” dissolved sealer into grout lines. Usage rate will be approximately 4m² per Litre. More **CYCLONE** will be required for removal of heavy build-ups of **ENDURE**.

Clean up Solvent:

1. Brushes and applicators may be cleaned by soaking in **CYCLONE**.

Always test first.
